

IN THE ABSTRACT OF THE DISCLOSURE:

Please replace the current Abstract with the following Abstract.

*B10*

A lithographic projection apparatus includes a radiation system to supply a projection beam of radiation; a mask table provided with a mask holder to hold a mask; a substrate table provided with a substrate holder to hold a substrate; a projection system to image an irradiated portion of the mask onto a target portion of the substrate; and a preparatory station comprising an intermediate table on which a substrate can be positioned before transfer to the substrate table; the intermediate table including a major surface provided with a plurality of apertures, and gas bearing generator that generates a gas bearing between the major surface and a substrate located thereon.

See the attached Appendix for the changes made to effect the above Abstract.
